

Facts on production, number and capacity

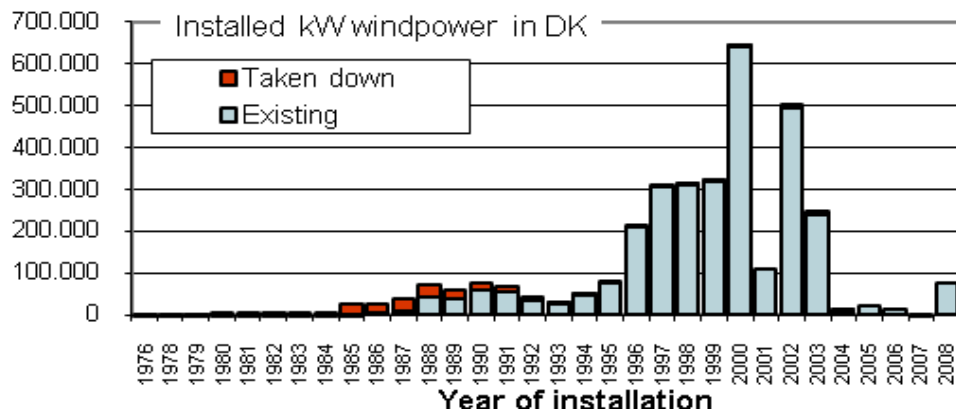

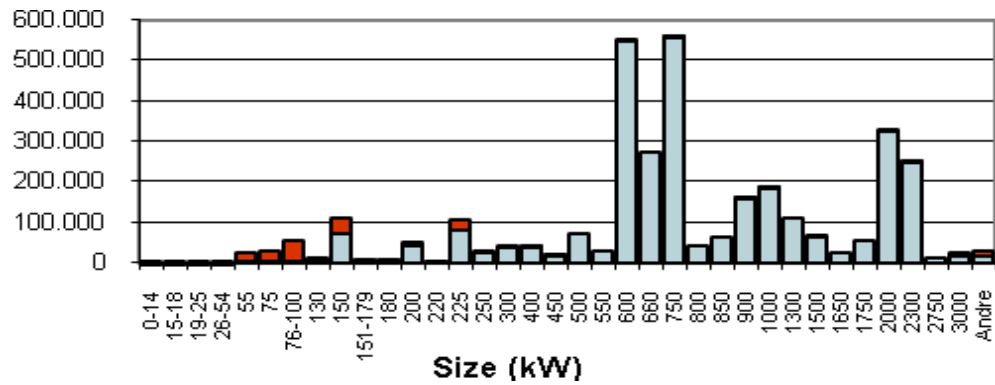

Wind turbines in Denmark (august 2009)

Number	5.024
Capacity	3.184 MW
Average age	12,7 years

Danish wind turbines by number

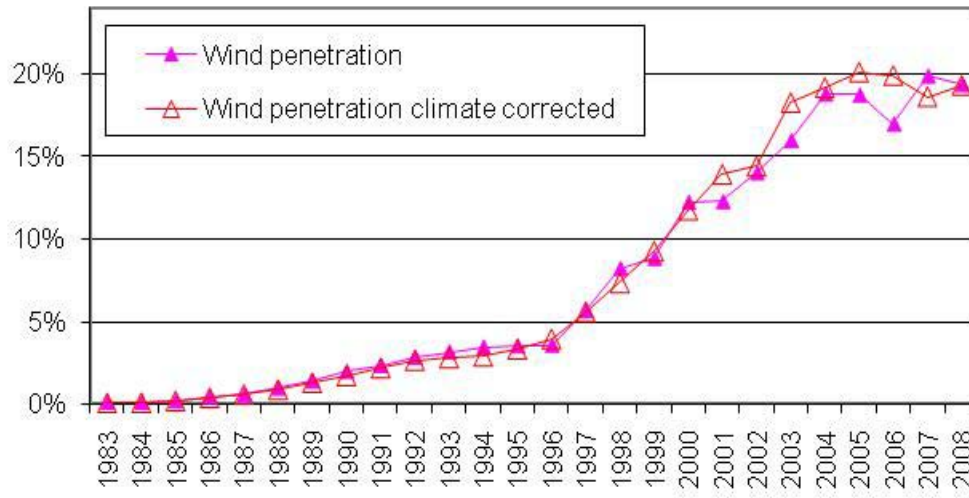

Danish wind turbines by capacity

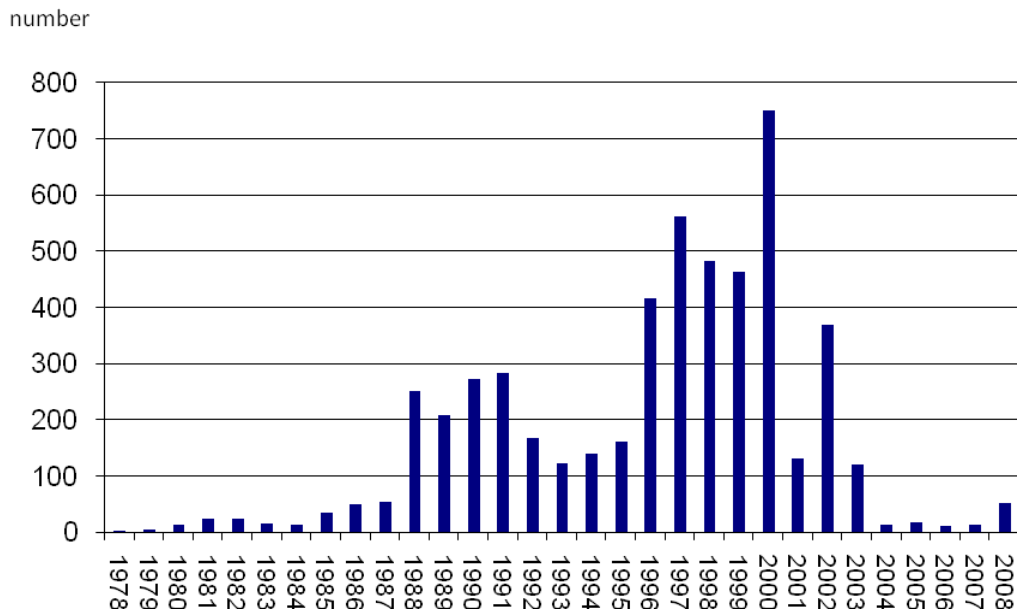

Production 2008, GWh

	The year 2008	2008 – corrected to normal wind year (climate corrected)
Windpower	6.963	6.952
Consumption of Electricity in DK	35.979	35.979
Coverage by windpower, % (wind penetration)	19,4 %	19,3 %

Part of electricity consumption from wind power

Operating turbines by year of installment
